Keyboard Basics Notes

Computer Basics for Beginners - Lesson 5

Useful keys to know

- Space bar: the long key at the bottom. It adds a space between words.
- Enter: starts a new line or confirms a choice.
- Backspace: deletes the character to the left of the cursor.
- Shift: hold it down while pressing a letter to type a capital letter.

Example: typing a capital letter

To type "John", hold down Shift, press J, let go of Shift, then type "ohn".

Remember

If you hold a key down, it repeats. Press Backspace to remove any extra letters.
