Mouse Practice Worksheet

Computer Basics for Beginners - Lesson 4

Practise each action five times

- Click: press the left button once on an icon on your desktop. [ ] done
- Double-click: press the left button twice quickly to open a folder. [ ] done
- Right-click: press the right button once to see more options. [ ] done

Tips

Keep your hand relaxed. If the pointer reaches the edge of the mouse mat, lift the mouse, move it back to the middle and carry on.

On a laptop touchpad, slide one finger to move the pointer and tap once to click.
